

Hungarian Ground

Hungarian Ground is a flat stitch with many different uses. By simply changing the colors or the threads you can totally alter its appearance and feel. It is a stitch that is easy to learn and easy to compensate which then allows you to have fun with it.

Stitch it all in one color as a background and quickly finish an area. Use two different shades, possibly of a green, creating a slightly striped effect for a Christmas tree. Choose two different threads both in the same color and create an elegant brocade pattern. Two contrasting colors will create a busy pattern.
