

Saint Mark's Cross

This is a variation of the Upright Cross. Bring your needle up on the odd numbers and down on the even working the first row from right to left. The horizontal thread will be on top.

Work the second row from left to right following the letters. The vertical thread will be on top.

Pay attention to the alternation of the rows. It is well worth the effort!

Use Saint Mark's Cross to create a soft pebbly texture; it fills small areas nicely with easy compensation. See diagram at right.
