

Star Stitch

STEP 1

STEP 2

Do you remember learning how to draw a five pointed star when you were a small child? That is the magic of this stitch!

Begin with step one above, following the graph for stitch order. You can use any thread you like depending upon the look you want. Use a metallic ribbon for a fully covered look or use a fine metallic for a lacey look.

STEP 3

Continue with step two bringing your needle up at the points of the star and down in the center. Step three is the finishing touch, again bring your needle up at the corners of the star and down in the center.

Once you see the pattern of the stitch it is easy to modify it to fit any size star or canvas. You can embellish it as you desire, adding a bead or crystal in the center or at the points of the star.

The next time you need to *wish upon a star* or to add a topper to your tree, you will have the perfect stitch.
